Dear Stephanie,

My understanding is that the NRP-AIAP is being rewritten to allow more drilling in areas that were recognized decades ago as containing extraordinary wildlife, habitat and subsistence resources. As our planet is rapidly losing these precious resources, I find it extremely irresponsible to hasten their demise. You know as well as I that increased fossil fuel development means further climate impacts. Does the IAP even address these? I believe strongly that there is no such thing as environmentally responsible oil and gas development.

I beg you to consider the health of our planet and the legacy that you will be leaving in promoting irresponsible land management.

Thank you, most sincerely, Margie Nulsen
